Back Office Product Sheet

Practice & Management Reporting System (MRS)

Product Features

- Standard reports have built-in flexibility to sort and group by virtually any analysis variable
- Users can define groups of reports to run periodically
- Users can easily define, save and preview reports, before running with a single click
- Report libraries are organized by categories for easy retrieval
- Report processing is subject to security permissions
- Report details can be grouped and summarized in order by analysis variable
- Users can define report filters

Reports transform raw data from time entries, bills, cash receipts and other activities into coherent presentations for analysis, helping law firms make wiser, fact-based decisions. Whether data is firm- or client-related, PerfectLaw® Management Reporting System (MRS) helps you gain a better perspective on how your firm is performing. Reports can be used to measure performance, review financial status, and strategize for greater efficiency and success.

PerfectLaw® offers MRS with one of the largest standard report libraries in the legal industry. With a built-in Report Designer, firms can modify any report layout or custom-design their own reports. These reports can be stored or emailed in a wide variety of standard file formats.

Benefits

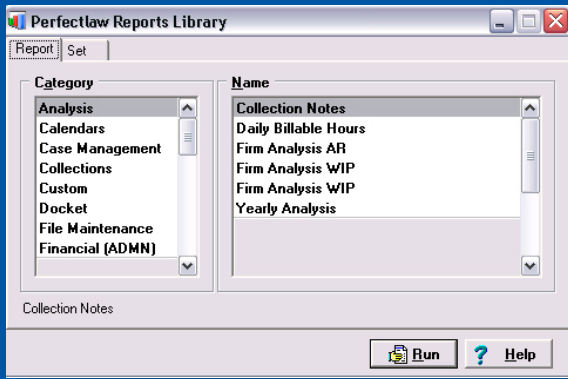

- MRS Analytics supports Business Intelligence tools such as Dashboards, Pivot Tables and OLAP cubes
- Security permissions enforce who can see what
- Flexible options help you provide required compliance reports
- Promotes accurate performance-based decisions

Functions

- Analyze data from virtually any perspective
- Export reports in various formats including XLS and PDF
- Run a group of reports in one step
- Easily access extensive library of standard reports
- Run reports based on a variety of analysis parameters
- Run and profile reports to the Document Management System (DMS) in one step
- Design customized reports with built-in Report Designer
- Drill down reports for interactive analysis
