

The original All-in-One®
Software Suite for
Case and Financial Management

Front Office Product Sheet

iDocuments™ for iPad & iPhone

Product Features

- Works on any device running the Apple iOS operating system, including Apple iPhone, iPad, or iPod touch
- Designed specifically for Apple mobile devices to take advantage of their unique interface and storage capabilities
- Share documents with your clients and contacts
- View documents and email** using the iDevice built-in, high-fidelity viewers for pdf, word, excel and other document formats
- Sharpen your meetings by displaying iDocuments on most projectors using Bluetooth or Apple Digital AV Adapter
- Stored login credentials (Password protected on the iPad) for instant, secure access to your PerfectLaw® servers using SSL security

It's here! PerfectLaw® is now available on your Apple mobile device. Users can now access their legal documents from anywhere at any time, 24/7 on their iPhone or iPad with Kindle®-like functionality. iDocuments™ allows users to search, select and wirelessly stream documents and document profiles from your firm's main server to any iOS phone or tablet. As documents are streamed, they are added to your device's local database, allowing you to view offline until you choose to remove them.

iDocuments also works in unison with iSlips to automate time tracking by recording time while the user reads documents through the app. Both apps, which are installed through iTunes, stream and share related case management data like document profiles, client/matter codes, and recent matters; all from your firm's main database server.

Create your own iCloud and enterprise workspace just like the big firms. Have the ability to browse AIM® matters securely while tracking billable time anytime, anywhere, whether in a meeting or even in court. You will always be prepared with iDocuments.

Benefits

- Work with documents offline when there is limited connectivity
- Puts your PerfectLaw® DMS server in the cloud and provide fast, easy, mobile document and email access
- Avoid meeting delays while your staff runs to their desk to print documents; simply project them from your iPad
- Save money...Use iDocuments on all your iDevices that run the Apple iOS operating system, including Apple iPhone, iPad, or iPod touch using one license

PERFECTLAW®
ALL-IN-ONE® SOFTWARE

iAIM™ is a suite of apps that includes iSlips, iDocs and iAIM communication services, a trademark of EDSi; iAIM™ communications adds technology to database servers that provide direct wireless connections between the PerfectLaw® databases and the iPad or iPhone using iCloud technology.

Functions

- Search, select, read, and download PerfectLaw® documents and document profiles on your iPad or iPhone online or offline wirelessly
- Search using the advanced built-in iAIM™ search tools
- Share documents with your clients
- Email PerfectLaw® documents from your iPad and record time slips that stream to your office timesheet automatically
- Build a local document case management database on your iPad automatically; and maintain a local iAIM™ database on your iPad of recent matters, document profiles, contacts, task codes...
- Dial phone numbers and view web-pages directly from documents

iDocuments provides easy access to important documents from your iPad or iPhone mobile device.
